

History

WRENTHAM TOOL GROUP

Wrentham Tool Group is a global supplier of cold heading tools used to produce fasteners ranging from simple nails to high performance aerospace products.

Since its' founding in Wrentham, Massachusetts in 1948, the Company has undergone many changes and continues to re-invent itself to better serve the dynamic global market.

Some of the most dramatic changes have come in the last 2 years. In July 2004, Wrentham Steel Products as it was known at that time, was purchased by Phillips Screw Company of Wakefield, MA. Phillips is known world-wide for innovative fastener recess designs and applications. The Company was re-named Wrentham Tool Products and re-located to a much larger facility in nearby Bellingham, MA. The close proximity to the prior location allowed WTP to retain most of its' highly skilled workforce and supporting staff of engineers and administrators.

The dedication of this group, along with significant investment by the Company in equipment and human assets, is a major reason the company mission of providing world class quality, value pricing and unparalleled customer service quality is being achieved.

WTG has aggressively expanded their offerings to include Aerospace Recess tooling such as ACR TORQ-SET®, TRI-WING®, ACR PHILLIPS® and the newly introduced MORTORQ®. WTP is also a TORX® licensee providing a full line of pins, holders and solid punches. WTP also manufactures a full line of carbide and steel heading tools including Hex Inserts, Hex Pins and Trim Dies.

Wrentham has increased its' inventory and has located it in strategic locations domestically and internationally. With sales agents world-wide our service to the customer is truly unparalleled in the Industry.

Wrentham Tool Group is an ISO 9001:2008 registered Company.
